

#### USES FOR OXYGEN AND ACETYLENE

- Oxygen and acetylene combined produce the hottest flame of any welding gas mixture.
- Oxy-acetylene mixtures are suitable for:
  - Welding
  - Brazing of pipes and tubes, including plumbing work, new installations and repairs
  - Heating and cutting of steel

#### USES FOR ARGON AND MIG SHIELDING GAS

- Both are suitable for welding of metal plate, tubing, sheet metal, furniture and automotive
- Argon is suitable for:
  - MIG welding of aluminium
  - TIG welding of mild steel, stainless steel, low alloy steel and aluminium
- MIG shielding gas is suitable for:
  - MIG welding of mild steel, stainless steel, low alloy steel and galvanised steel

## HERE'S HOW IT WORKS:

1

Purchase acetylene, oxygen, argon or MIG shielding gas supplied in the Coregas cylinder provided. See the price on the storage cage or ask in store.

2

When you're finished with your gas, simply return the empty Coregas cylinder to **EUREKA GAS** for a return transaction. See the value of the return on the storage cage – the difference is the value of the gas inside.

3

Start the process again.  
It's that simple!
